Menominee Superintendent of Schools Miles W. Robinson, after studying the Marinette announcement, issued a statement saying in part:

"Menominee has agreed to all of the conditions of the contract you submitted but one. You ask for three officials and our athletic board feels this game warrants use of four officials for the safety of the players on the field.

"We also feel this would reduce the possibility of criticism of officials' decisions. The selection is not an issue as we have constantly stated Marinette may make selection from any source as long as they are registered high school athletic association officials."

The schools began their series in 1894, making it the oldest in either Wisconsin or Michigan and according to an Associated Press check years ago one of the oldest in the nation. The only previous interruptions were before 1909.

In 1952 the contest drew a record crowd of 8,560. The schools compete in other sports as well. There was no indication those meetings would be discontinued.

PSC to Check Land Flooding

MADISON (AP) — The Wisconsin Public Service Commission said today it had determined it had the authority to investigate land flooding and could take necessary action to remedy such conditions.

The commission said because of this decision it would hold a hearing to determine the kind of protection needed and the cost to prevent recurrent flooding in the Town of Preble near Green Bay.

Forty-four property owners petitioned the commission for relief, contending their homes were flooded frequently by waters from Green Bay and the Fox River.

The commission will determine how such protection should be given, the cost and who should pay for it. No date has been set for the hearing.

The Wisconsin Public Service Corporation was granted permission to install electric facilities including a transmission line between Grand Father Falls and Rhinelander, a hydroelectric plant and substation at a cost of \$563,050. Oct 6 1952
